

# Nail Laminated Columns

Littfin Truss Company offers a 50-YEAR WARRANTY on our Nail Laminated Columns.

Littfin laminated columns are manufactured using CCA pressure treated lumber in the treated portion of their columns. This portion of the column has been treated to a total retention of .60 pounds of CCA preservative per cubic foot of wood.

This warranty is extended to the original buyer of the product and concerns only the replacement of the columns. Other expenses such as labor, freight, loss of service, or any other cost not explicitly stated in this warranty are not covered.

It is the responsibility of the original buyer to insure that the columns have been properly handled, stored, incorporated into the total building design per the building engineer's specifications, and installed per the manufacturer's specifications.

This warranty does not apply to damages caused by natural disasters or any incident that is out of the control of Littfin Truss Company.
